

PRODUCT INFORMATION

20 FOOT VSD CONTAINERS

External view of container

External Air Cooled Condensers

Description:

A specially built fully self contained unit, based on a standard 20 foot Container (6058 x 2348 x 2800 mm), for zone 2, DnV certified to 2.7-1 and modified to suit customer's specific requirements.

This type of container can be supplied with one or 2 rooms with space for a small office/control room and the VSD's.

The Container is A60 insulated and this example has 2 A60 stainless steel doors.

The container comes equipped with cooling and fresh air, in this particular example, a 45kW AC unit and an Ex supply fan with a 6 kw heater.

2 x 100% air cooled condensers and the supply fan are mounted externally on the end section of the container.

Ventilation supply and VSD Cabinet

ATC do all engineering, fabrication, procurement, including the HVAC system, installation and testing on this container..
